Special points of interest:

- *Real Wood - No Exotic prices ! Par-Ky gives you genuine timber for the price of a good laminate.*
- *Every single board is unique - identical trees don't exist in nature.*
- *There is a full range of matching skirtings and accessories available with the Par-Ky Lounge range*

Par-Ky genuine wood veneer flooring offers the best of both worlds for your project – the warmth and feel of real wood and the advantages of a laminate composite.

Because the top layer is real wood you see and feel genuine timber. The high density fibre (HDF) core means the boards are ultra strong and have greater impact and moisture resistance than solid timber. This combined with the extremely hard eight layer “Dia-Pro” surface coating system gives you a floor which is suitable for use in light commercial applications like shops and offices, leisure applications such as hotel bedrooms and elegant housing projects.

By choosing a Par-Ky product you also take care of the environment. While the product is manufactured from natural resources, it is done without harming the environment. The veneer technique means that you get the same level of comfort and unique features of solid wood but use 25 times less timber. Also all the wood used originates from sustainable forests. This is guaranteed by the manufac-

Unique, tough and affordable the Par-Ky “Lounge” range is suitable for most projects.

turers “Pure-Wood” charter to which all their suppliers have to subscribe and their FSC certification. The fact that no Aluminium oxide is used in the wear layer also means that the product is completely recyclable as a fuel source.

Choosing Par-Ky is also choosing a healthy living environment. The collection complies with the strictest norms regarding volatile organic substance

emissions. This means no toxins are released into your home or working space.

The sealed Par-Ky boards are available in satin lacquered and a brushed “open grain” matt finish which enhances the wood structure even further. Par-Ky is easy to clean and maintain and will never require re-sanding.
